

HUDA RASMEY

Unreal & Unity Game Programmer — Multiplayer, GAS, AI Systems

Abu Dhabi, UAE | huda.rasmeysc@gmail.com | (+971) 50-395-0918 | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Game Programmer with 10+ years in Unity3D and 4+ years in Unreal Engine, building multiplayer, gameplay, and AI systems for PC, mobile, and VR/AR titles. Deep hands-on experience with Unreal's Gameplay Ability System (GAS), including ability/input queuing and combat systems, plus editor tooling and Python-based pipeline automation. Track record of mentoring junior developers and owning systems end-to-end in C++, C#, and Python.

CORE SKILLS

- Languages & Engines: C++, C#, Python, Unreal Engine (UE4/UE5) incl. Blueprints, Unity3D
- Gameplay Systems: Gameplay Ability System (GAS), AI (pathfinding, behavior trees), physics-based mechanics, animation blending & IK
- Multiplayer: Client-server architecture, Photon networking, Unreal replication/GAS-based multiplayer
- Platforms: PC, Mobile (Android/iOS), VR/AR (Oculus, ARKit)
- Tools: Visual Studio, Rider, Git, Perforce, Unreal Insights, Unity Profiler, Firebase
- Workflow: Agile (Scrum, Kanban), Jira, Trello
- Leadership: Team leadership, project management, mentoring & onboarding junior developers

PROFESSIONAL EXPERIENCE

Unreal Game Programmer — My Whoosh Technology *(June 2025 – Present)*

- Refactored the player customization and player animation systems to be extendable, reducing effort required to add new features.
- Migrated Blueprint gameplay logic to C++, producing cleaner, more maintainable code and faster feature turnaround.
- Built custom Unreal Editor tools to streamline team workflows and speed up iteration.
- Developed Python-based automation systems to support internal pipelines and reduce manual overhead.

Volunteer Game Developer & Tech Lead — P1Games *(May 2024 – 2025)*

- Led a technical team, organizing sprints and task ownership to hit delivery milestones.
- Developed features across Unreal and Unity engines, maintaining quality and deadline commitments.

Senior Game Developer — Toptal *(Oct 2022 – 2023 (freelance, single engagement))*

- Delivered a client Unreal Engine (C++) project as an independent freelancer, managing the technical roadmap directly with the client.

Unreal Game Programmer — Ironbelly Studios *(Jan 2023 – Aug 2024)*

- Built and shipped a Gameplay Ability System (GAS)-based ability/input queue system handling complex, time-sensitive input conditions.
- Developed AI plugins and a throwable-object system in C++ for PC titles.
- Mentored junior developers through onboarding, accelerating ramp-up time on the codebase.

Senior Unreal Game Programmer — Instinct Games *(Apr 2021 – Jan 2023)*

- Engineered PC gameplay features and integrated VFX assets in Unreal Engine.
- Partnered with QA to identify and resolve gameplay bugs pre-release, improving build stability.

Lead Unity Game Developer — Besteam *(June 2020 – Feb 2021)*

- Built robotics-competition levels for kids to compete remotely, using Unity3D and WebGL.
- Managed the team to deliver tasks on schedule.

Senior Unity Game Developer — FunRock *(July 2018 – March 2019)*

- Owned frontend/UI development for Android and iOS titles.
- Built a reinforcement system and an Events & Quests system, contributing to player retention.

Senior Unity Game Developer — Cryptyd Game Studio *(March 2018 – July 2018)*

- Built backend and networking (Kii, PlayFab) for Android and iOS titles.

Lead Unity Game Developer — 5D-VR *(March 2015 – Feb 2018)*

- Managed and developed VR games across Kinect, HTC Vive, Oculus, Samsung Gear, and cardboard, plus AR apps for iOS and Android.
- Developed multiplayer games using GameSparks.

KEY PROJECTS

- Dynamic Camera System (Unreal) — Event-responsive camera with additive profiles (zoom, sprint) and smooth blended transitions between states.
- Input/Ability Queue System (Unreal, GAS) — Ability management system resolving complex, overlapping input conditions to prioritize optimal ability timing.
- AI Attack Token System (Unreal) — Token-based combat coordination system enabling flexible, context-aware AI attack behavior.

EDUCATION

Master of Business Administration (MBA) — Liverpool John Moores University, 2024 – Feb 2026

Game Development Diploma — Information Technology Institute, 2011 – 2012

Bachelor of Computer Science — Ain Shams University, 2006 – 2010
